A world leader in climate and energy technology

The Danfoss Group operates globally with the primary aims of making modern living possible for our stakeholders and being a leader in refrigeration, heating, power electronics, and mobile hydraulics.

We employ 24,000 people and produce approximately 250,000 components each day at our 76 factories in 25 countries.

We promise leadership in our businesses through reliability, excellence, and innovation – driving true customer satisfaction and solutions within climate and energy.

Extensive experience in all key HVAC/R segments: Danfoss plays a leading role in research, development and production in a wide spectrum of industries, and has been a key player in the HVAC/R field for more than 75 years. Our Refrigeration & Air Conditioning Division designs, produces and markets a comprehensive range of automated solutions and compressors for a wide variety of HVAC/R segments, including:

- Heat Pumps
- Commercial Air Conditioning
- Residential Air Conditioning
- Commercial Refrigeration
- Household, Light Commercial and Mobile Refrigeration
- Wholesalers & Installers
- Industrial Refrigeration
- Food Retail

Protect your HVAC/R system with the most reliable Filter drier in the market

Wide range of Danfoss Filter driers
Filter dryers

The Filter dryer is a vital component of the system’s reliability as well as its longevity. When you choose Danfoss filter dryers, you are guaranteed a product that has been developed specifically for the challenges encountered in Air Conditioning and Refrigeration Systems.

Danfoss range of filter dryers covers both hermetic and exchangeable core types. The core makes the filter dryer drought-waters and exchangeable types to protect the compressor’s metal surfaces and ensure that oil and refrigerant do not decompose. All Danfoss filter dryers feature a solid core. Tests have shown that a solid core filter dryer has better adsorption rates, a smaller flow area, as well as a low pressure drop, which can minimise maintenance and running costs.

Regardless of the applications, there is a Danfoss Filter dryer that will provide your system with long-lasting and reliable protection.
