

PTC Starting Devices Type 103N

As pr. 1 November 2011 Secop launches two new PTC starting device code numbers with side accessible screw connections (Fig.1):

103N0026 and
103N0027.

Code numbers 103N0011, 103N0026 and 103N0027 will replace PTC starting devices with front accessible screw connections 103N0002, 103N0003 and 103N0017, which can be purchased until our stock runs empty.

After that Secop will only produce PTC starting devices with side accessible screw connections, and these can be applied for all our platforms:

P/T/D/N/F/ S-Series compressors
according to our data sheets.

Release of new code numbers

103N0002 will be replaced by 103N0011
103N0003 will be replaced by 103N0026
103N0017 will be replaced by 103N0027
(Fig.2)

Functionalities of the replacement code numbers are the same, only the screw accessibility is different.

Please get in touch with your Danfoss contact if any further information is needed.
