Danfoss in brief

Danfoss engineers technologies that enable the world of tomorrow to do more with less. We meet the growing need for infrastructure, food supply, energy efficiency, and climate-friendly solutions. Our products and services are used in areas such as refrigeration, air conditioning, heating, motor control, and mobile machinery. We also operate in the field of renewable energy, as well as district energy infrastructure for cities and urban communities.

The Group is divided into four business segments: Danfoss Power Solutions, Danfoss Cooling, Danfoss Drives, and Danfoss Heating. Danfoss Power Solutions is a leading player in hydraulic systems and components for powering off-highway mobile machinery. Danfoss Cooling is a market leader in the air-conditioning and refrigeration industry. Danfoss Drives' key expertise lies in low-voltage AC drives, power modules, and stacks for a number of industries. Danfoss Heating enjoys leading positions within residential heating, commercial heating, and district energy.

Danfoss is a privately-owned company, which has grown and improved its skills and expertise in energy-efficient solutions over more than 80 years. Danfoss was founded by Mads Clausen, and today the company is controlled by the Bitten and Mads Clausen Foundation.

Highlights 1st half-year 2017

More than
25,000
employees globally

69
factories in 20 countries

Products sold in more than
100
countries worldwide

Sales split on regions – 1st half-year 2017

- Western Europe
- Eastern Europe
- Asia-Pacific
- North America
- Latin America
- Africa-Middle East

Sales split on segments – 1st half-year 2017

- Danfoss Power Solutions
- Danfoss Cooling
- Danfoss Drives
- Danfoss Heating

When the ratios have been defined according to "Recommendations & Key Figures 2015", as prepared by the Danish Association of Financial Analysts, the ratios are computed according to these.

Financial **update**

The Danfoss Group continued the high growth in sales and achieved a satisfactory first half-year result. Earnings and cash flows were in line with expectations after high investments in digitalization and growth initiatives. Sales increased 13% to DKK 21,826m, corresponding to 11% local currency growth. Earnings (EBIT) improved to DKK 2,276m, corresponding to an EBIT margin of 10.4%. Outlook for 2017 is confirmed.

Sales

The first six months of 2017 were characterized by strong top line growth. Sales grew DKK 2,431m to DKK 21,826m (H1 2016: DKK 19,395m), corresponding to local currency growth of 11% (H1 2016: 4%). The reported growth was 13% after a positive currency impact of 2%.

All business segments contributed to the high sales growth, and particularly Danfoss Power Solutions performed strongly. The sales performance was driven by targeted growth initiatives, which include, among other things, new application development centers and strategic refocusing of sales activities towards specific vertical markets to take market share. Furthermore, the Group sales benefited from the acquisitions of Sondex and White Drive Products, which were completed in 2016. In addition, some markets saw improvement, due to increasing investment levels, but on the

other hand, some markets were impacted by low visibility and uncertainty.

Earnings

Operating profit excluding other income and expenses improved 10% to DKK 2,473m (H1 2016: DKK 2,242m). Operating profit (EBIT) improved 3% to DKK 2,276m (H1 2016: DKK 2,212m), leading to an EBIT margin of 10.4% (H1 2016: 11.4%). EBIT was impacted by increased investments in digitalization, growth initiatives, and recently acquired activities, which temporarily dilute margins.

Net profit was up 4% to DKK 1,488m (H1 2016: DKK 1,428m), mainly driven by the EBIT improvement.

Balance sheet

At June 30, 2017, total assets were up 9% to DKK 41,649m (H1

Development in key markets

Danfoss had a positive development in several markets, and some markets saw improvements from increased activity levels. Danfoss is well positioned to benefit from the global growth picking up, which was demonstrated by the strong sales performance in the first six months of 2017.

In **Europe**, Danfoss continued the positive development, especially with growing momentum in the Northern and Southern European countries. Growth is driven by Danfoss Cooling, but all business segments are performing well in Europe. In Russia, Danfoss is again seeing growth.

In **North America**, the mixed market conditions across business segments have continued. Growth is driven by Danfoss Power Solutions, which is recording a strengthening of the US market, especially in the distribution business, while Danfoss Drives is also doing well in the region.

In **Asia-Pacific**, growth is driven by high double-digit growth rates in China, supported by the strong political focus on energy efficiency and reduction of carbon emissions (CO₂). Also, other countries in the region continue to grow, such as Korea and Japan, while India continues with double-digit growth rates. Growth was driven by a strong performance in all business segments, led by Danfoss Power Solutions and Danfoss Cooling.

In **Latin America**, the mixed market conditions continued, but growth traction is building in Brazil, mainly driven by Danfoss Power Solutions. Overall, the region continues to be impacted by a soft economic situation in Brazil.

In **Africa-Middle East**, the performance was driven by Danfoss Heating, mainly in Turkey, and positive developments in Danfoss Drives. Some markets in the region were impacted by low visibility and uncertainty.

2016: DKK 38,184m). The higher level can primarily be ascribed to the acquisitions and higher activity level. Equity increased 11% to DKK 17,639m (H1 2016: DKK 15,851m), mainly due to accumulated profits. Consequently, the equity ratio was 42.4% (H1 2016: 41.5%).

Net interest-bearing debt increased to DKK 10,038m (H1 2016: DKK 9,484m), leading to a net interest-bearing debt to EBITDA ratio of 1.6 (H1 2016: 1.5). The Group has a BBB credit rating assigned by Standard & Poor's with a stable outlook.

Cash flows

Cash flow from operating activities amounted to DKK 980m (H1 2016: DKK 1,596m). The lower level is mainly attributable to the higher activity level, leading to increased inventories and receivables. Cash flow from investing activities totaled DKK -834m (H1 2016: DKK -643), mainly due to increased investments in digitalization and production capacity.

Free cash flow before mergers and acquisitions was DKK 240m (H1 2016: DKK 976m), as the EBIT improvement was offset by the changes in working capital and increased investments. Thus, free cash flow totaled DKK 147m (H1 2016: DKK 953m).

Innovation

In the first six months of 2017, the research and development spend increased to DKK 891m (H1 2016: 815m), corresponding to 4.1% of sales (H1 2016: 4.2%).

During the second quarter 2017, Danfoss announced

the acquisition of the software company Prosa, which is specialized in IoT (Internet of Things) and user interface design. The acquisition will help Danfoss to expand the development and offering of connectivity solutions for cold rooms within food and beverage equipment.

In addition, Danfoss acquired the Kavlico thin film sensor technology, which is used for higher application temperature and pressure, e.g. within mobile hydraulics and industrial engines. The acquisition will further strengthen the Danfoss portfolio with new technology.

Employees

At June 30, 2017, the Danfoss Group had 25,828 employees against 25,292 at the beginning of 2017.

Management change

As of July 1, 2017, Kim Fausing took over as President & CEO. He will continue the Danfoss strategy, focusing on profitable growth and digitalization.

Events occurring after the balance sheet date

No significant events occurred after June 30, 2017.

Outlook for 2017 confirmed

In 2017, the management expects top line growth above market level with a profitability on par with 2016, while fueling significant investments in digitalization to drive long-term sustainable value creation.

Expectations for 2017

We expect to maintain or expand our market share, while maintaining the profitability measured as margin at the 2016 level, following significant investments in digitalization.

The outlook is unchanged relative to the outlook published in the Annual Report 2016, which is available at danfoss.com/about/financial-information.

Forward-looking statements

This interim announcement includes forward-looking statements, which are subject to risks and uncertainties, because various factors, many of which are beyond Danfoss' control, may cause actual developments and results to differ materially from the expectations set out in the interim announcement. Reference is made to the forward-looking statements in the Annual Report 2016.

Business segments review

Danfoss **Power Solutions**

Leading player and industry pioneer in the mobile hydraulics market.

Financial performance 1st half-year 2017

Danfoss Power Solutions delivered a very strong performance with sales and profitability above the prior-year level, including the impact from the acquisition of White Drive Products. The strong earnings were driven by the increased sales and a healthy contribution margin.

Market developments 1st half-year 2017

The mobile hydraulics market showed growth traction within distribution and global construction. Danfoss Power Solutions delivered growth in all regions. The main North America market showed good growth, while China, Brazil, and the countries in the Turkey, Middle East and Africa region contributed with high double-digit growth rates.

Danfoss **Cooling**

Market leader and industry front-runner in the air-conditioning and refrigeration industry.

Financial performance 1st half-year 2017

Danfoss Cooling delivered a satisfactory performance with sales above and profitability slightly below the prior-year level on the back of strong comparative figures.

Market developments 1st half-year 2017

Danfoss Cooling saw a mixed performance across regions and product categories with high double-digit growth rates in China and India and low growth in North America. The Southern and Northern European countries performed well.

Danfoss **Drives**

Leading player in the market for low-voltage AC drives.

Financial performance 1st half-year 2017

Danfoss Drives continued the positive development with sales above the prior-year level and profitability on level with last year.

Market developments 1st half-year 2017

The global drives market continued to show some growth traction within several heavy industry sectors. Danfoss Drives delivered growth in most regions, led by double-digit growth rates in China and other countries in the Asia-Pacific region, while North America and the Northern and Southern European countries showed good growth.

Danfoss **Heating**

Market leader within residential and commercial heating and district energy.

Financial performance 1st half-year 2017

Danfoss Heating delivered strong growth, including a significant effect from the acquisition of Sondex, but posted profitability below the prior-year level.

Market developments 1st half-year 2017

Danfoss Heating maintained momentum and realized sales growth in most parts of Europe as well as in China. Sales in Russia were improving, but still impacted by challenging market conditions within construction, new build, and renovation.
