## Danfoss in brief

Danfoss engineers technologies that enable the world of tomorrow to do more with less. We meet the growing need for infrastructure, food supply, energy efficiency, and climate-friendly solutions. Our products and services are used in areas such as refrigeration, air conditioning, heating, motor control, and mobile machinery. We also operate in the field of renewable energy, as well as district energy infrastructure for cities and urban communities.

The Group is divided into four business segments: Danfoss Power Solutions, Danfoss Cooling, Danfoss Drives, and Danfoss Heating. Danfoss Power Solutions is a leading player in hydraulic systems and components for powering off-highway mobile machinery. Danfoss Cooling is a market leader in the air-conditioning and refrigeration industry. Danfoss Drives' key expertise lies in low-voltage AC drives, power modules, and stacks for a number of industries. Danfoss Heating enjoys leading positions within residential heating, commercial heating, and district energy.

Danfoss is a privately-owned company, which has grown and improved its skills and expertise in energy-efficient solutions over more than 80 years. Danfoss was founded by Mads Clausen, and today the company is controlled by the Bitten and Mads Clausen Foundation.

## Highlights 1<sup>st</sup> to 3<sup>rd</sup> quarter 2017

More than  
**26,000**  
employees globally

**69**  
factories in 20 countries

Products sold in more than  
**100**  
countries worldwide

Sales split on regions – 1<sup>st</sup> to 3<sup>rd</sup> quarter 2017

- Western Europe
- Eastern Europe
- Asia-Pacific
- North America
- Latin America
- Africa-Middle East

Sales split on segments – 1<sup>st</sup> to 3<sup>rd</sup> quarter 2017

- Danfoss Power Solutions
- Danfoss Cooling
- Danfoss Drives
- Danfoss Heating

Sales and growth

- Sales DKKbn
- Sales growth in local currency

Earnings

- EBIT DKKbn
- EBIT margin

Cash flow

- Cash flow from operating activities DKKbn
- Free cash flow before M&A DKKbn
- Free cash flow DKKbn

When the ratios have been defined according to "Recommendations & Key Figures 2015", as prepared by the Danish Association of Financial Analysts, the ratios are computed according to these.

# Financial **update**

The Danfoss Group continued the momentum with strong growth and improved earnings after high investments in digitalization and growth initiatives. Sales increased 12% to DKK 32,475m. Earnings (EBIT) improved to DKK 3,664m, corresponding to an EBIT margin of 11.3%. Free cash flow increased, while the strong growth consumed more net working capital. Outlook for 2017 is confirmed.

## Sales

The strong sales development, which characterized the first two quarters of 2017, continued into the third quarter of 2017, resulting in strong top line growth for the first nine months of the year. Sales grew DKK 3,351m to DKK 32,475m (Q3 2016: DKK 29,124m), corresponding to local currency growth of 12% (Q3 2016: 3%). Thus, the reported growth of 12% was not impacted by any currency conversion effect.

The growth was broadly based, and Danfoss Power Solutions, in particular, had a strong performance. The Group's overall positive development was driven by targeted growth initiatives, which include, among other things, new application development centers and directing of sales activities towards specific vertical markets to take market share. Furthermore, the Group sales benefited from the acquisitions of Sondex and White Drive Products, which were completed in the third quarter last year.

Some markets saw improvement, due to increasing investment levels; most significantly within construction and infrastructure in China and North America. In China, demand was further supported by a strong political focus on energy efficiency and reduction of carbon emissions (CO<sub>2</sub>), which is benefiting the Danfoss business in general.

## Earnings

Operating profit excluding other income and expenses improved 14% to DKK 3,983m (Q3 2016: DKK 3,504m). Operating profit (EBIT) improved 6% to DKK 3,664m (Q3 2016: DKK 3,462m), leading to an EBIT margin of 11.3% (Q3 2016: 11.9%). EBIT was impacted by the increased investments in digital transformation, growth initiatives, and recently acquired activities, which temporarily dilute margins.

Net profit was up 8% to DKK 2,424m (Q3 2016: DKK 2,249m), mainly driven by the EBIT improvement.

## Development in key markets

In the first nine months of 2017, Danfoss' strong growth was driven by significantly increasing sales in China and North America, but all regions contributed with growth. Danfoss saw a market recovery in several countries and sectors, but however, visibility remains fairly low, as we do see some uncertainty in the geopolitical environment.

In **Europe**, Danfoss continued the momentum with increasing sales in Western and Eastern Europe, the latter driven by Russia, where growth seems to take hold. All business segments performed well in Europe, representing almost half of Danfoss' total sales.

In **North America**, the Danfoss business segments faced diverse market conditions with Danfoss Power Solutions and Danfoss Drives showing good growth, due to own growth initiatives as well as a strengthening of the markets, in which they operate.

In **Asia-Pacific**, the increasing sales were mainly driven by high double-digit growth rates in China, but also other countries in the region saw good growth, such as South Korea and Australia. Furthermore, India continues to grow. All business segments contributed with growth in the region.

In **Latin America**, the increasing sales were mainly driven by Brazil, where growth traction is building. Overall, the region continues to be characterized by mixed market conditions across countries and business segments, impacted by the soft economic situation in Brazil. Especially Danfoss Cooling and Danfoss Power Solutions are doing well in the region.

In **Africa-Middle East**, growth was driven by Turkey, where all the business segments are performing well. Some markets in the region were characterized by low visibility and uncertainty, but especially Danfoss Heating is showing a good development in the region.

### Balance sheet

At September 30, 2017, total assets increased 2% to DKK 41,348m (Q3 2016: DKK 40,517m), and the equity increased 11% to DKK 18,356m (Q3 2016: DKK 16,574m), mainly due to the accumulated profits. Consequently, the equity ratio increased to 44.4% (Q3 2016: 40.9%).

The net interest-bearing debt was reduced by DKK 1,530m to DKK 8,714m (Q3 2016: DKK 10,244m), leading to a net interest-bearing debt to EBITDA ratio of 1.4 (Q3 2016: 1.6). The Group has a BBB credit rating assigned by Standard & Poor's with a stable outlook.

### Cash flows

Free cash flow increased to DKK 1,407m (Q3 2016: DKK 523m). The improvement should be seen in the light of the completed acquisitions during the third quarter 2016, which impacted the cash flows last year.

Cash flow from investing activities totaled DKK -1,278m (Q3 2016: DKK -2,889), primarily reflecting the investments in digitalization and production capacity this year. Last year, the investments also comprised the completed acquisitions of Sondex Holding A/S and White Drive Products, Inc.

Accordingly, the free cash flow before mergers and acquisitions was DKK 1,513m (Q3 2016: DKK 2,428m), as the EBITDA improvement was offset by the increased investments and changes in working capital, due to the increased sales.

### Innovation

In the first nine months of 2017, the research and development spend increased DKK 87m to DKK 1,305m (Q3 2016: 1,218m), corresponding to 4.0% of sales (Q3 2016: 4.2%).

### Employees

At September 30, 2017, the Danfoss Group had 26,161 employees against 25,292 at the beginning of 2017.

### Events occurring after the balance sheet date

On November 1, 2017, Danfoss announced the acquisition of Visedo Oy, a world-leading expert in electric solutions for the marine and off-highway market, based in Finland. With this step, Danfoss enables access to electric solutions, which will further strengthen the business and market position of Danfoss Power Solutions.

## Outlook for 2017 confirmed

In 2017, the management expects top line growth above market level with a profitability on par with 2016, while fueling significant investments in digitalization to drive long-term sustainable value creation.

### Expectations for 2017

We expect to maintain or expand our market share, while maintaining the profitability measured as margin at the 2016 level, following significant investments in digitalization.

The outlook is unchanged relative to the outlook published in the Annual Report 2016, which is available at [danfoss.com/about/financial-information](http://danfoss.com/about/financial-information).

### Forward-looking statements

This interim announcement includes forward-looking statements, which are subject to risks and uncertainties, because various factors, many of which are beyond Danfoss' control, may cause actual developments and results to differ materially from the expectations set out in the interim announcement. Reference is made to the forward-looking statements in the Annual Report 2016.

## Business segments review

### Danfoss **Power Solutions**

Leading player and industry pioneer in the mobile hydraulics market.

#### **Financial performance Q3 YTD 2017**

Danfoss Power Solutions delivered a very strong performance with significantly increased sales and profitability year over year. The increasing sales and good cost control resulted in strong earnings.

#### **Market developments Q3 YTD 2017**

The mobile hydraulics market showed growth within distribution and global construction, and Danfoss Power Solutions delivered growth in all regions and relevant markets. Growth was driven by a very good performance in North America and China, and the Central European countries as well as Brazil also performed well.

### Danfoss **Cooling**

Market leader and industry front-runner in the air-conditioning and refrigeration industry.

#### **Financial performance Q3 YTD 2017**

Danfoss Cooling delivered a satisfactory performance with sales above and profitability slightly below the prior-year level on the back of strong comparative figures.

#### **Market developments Q3 YTD 2017**

Danfoss Cooling saw a mixed performance across regions and product categories, as some markets are fast-growing and others characterized by a low growth environment. The increasing sales were driven by strong growth in China, and South Europe, Brazil and Russia also developed positively.

### Danfoss **Drives**

Leading player in the market for low-voltage AC drives.

#### **Financial performance Q3 YTD 2017**

Danfoss Drives continued the positive development with higher sales year over year and profitability on par with the prior-year level.

#### **Market developments Q3 YTD 2017**

The global drives market continued to show some growth traction within some heavy industry sectors. Danfoss Drives delivered growth in most regions, led by strong growth in China and other countries in the Asia-Pacific region. North America and the Northern and Southern European countries also contributed well to the increased sales.

### Danfoss **Heating**

Market leader within residential and commercial heating and district energy.

#### **Financial performance Q3 YTD 2017**

Danfoss Heating delivered strong growth, including a significant effect from the acquisition of Sondex, but posted profitability close to the prior-year level.

#### **Market developments Q3 YTD 2017**

Danfoss Heating maintained momentum and realized solid sales growth. Sales increased across markets and regions except for the Southern European countries, which were impacted by challenging market conditions within residential heating. Also, Russia and China delivered a good performance with improving sales.
