Items Supplied

- LCP cable, IP54
- Gasket
- Screws
- Mounting plate brackets (2)

More Items Required

- Local control panel (LCP), ordering number 130B1107.

Safety Instructions

For important information about safety precautions for installation, refer to the VLT® DriveMotor FCP 106/FCM 106 Operating Instructions.

**WARNING**

DISCHARGE TIME

The frequency converter contains DC-link capacitors, which can remain charged even when the frequency converter is not powered. High voltage can be present even when the warning LED indicator lights are off. Failure to wait the specified time after power has been removed before performing service or repair work can result in death or serious injury.

- Stop the motor.
- Disconnect AC mains and remote DC-link power supplies, including battery back-ups, UPS, and DC-link connections to other frequency converters.
- Disconnect or lock PM motor.
- Wait for the capacitors to discharge fully. The minimum duration of waiting time is specified in Table 1.1.
- Before performing any service or repair work, use an appropriate voltage measuring device to make sure that the capacitors are fully discharged.

Table 1.1 Discharge Time

1) Power ratings relate to normal overload (NO), see VLT® DriveMotor FCP 106/FCM 106 Operating Instructions.

Mechanical Installation

1. Fit gasket on LCP, see Illustration 1.1.

Illustration 1.1 Fit Gasket on LCP

2. Cut out the panel with the dimensions shown in Illustration 1.2.

3. Position LCP with gasket onto the panel as shown in Illustration 1.2.

Illustration 1.2 Mounting of LCP on Panel
4. Position bracket on the back of the LCP, then slide down.
5. Fasten bracket to the LCP using the screws supplied. Tightening torque is 1.3 Nm.

Electrical Installation for FCP 106 and FCM 106

**Notice**

For FCP 106 and FCM 106, remote mounting of the LCP is intended for set-up and maintenance purposes only, and is not suited for permanent installation. The LCP cable has ingress protection class IP54, and is not UL listed or UL recognized.

1. Connect LCP cable at the panel as shown in Illustration 1.3.
2. Connect LCP cable at the frequency converter as shown in Illustration 1.4.
