

AK-SC255

Product Release Information

Software Release Version 02.081 (AK-SC255)

December 2008

Version 02.081 AK-SC 255 software is released today for field upgrade together with a new bootloader version 5.1. Version 5.4 of the remote commissioning software tool (AKA65) is recommended. Factory supplied AK-SC255 units with 02_081 software will be available from 12/12/08. *This document contains Important information - please ensure this is fully read before attempting any AK-SC255 updates.*

Software name	WIN 255 filename	Firmware	Replaces
R02.081 (Rack version)	VR02_081.exe	VR02_081.cmot	VR02_075.exe / .CMOT
L02.081 (L version)	VL02_081.exe	VL02_081.cmot	VL02_073.exe / .CMOT

Requirements:

AKA65 software version 5.4 / AK255 Boot Loader version 5.1

For EKC Modbus support use AK-SC255 CPU baseboard H/W revision V1.5 and above. If Modbus is used, RS485 host network is not availabe - use Ethernet mode.

Summary of changes / software description:

2.081 is a (major) software update for the AK-SC255 controller and is recommended for all users wishing to update system functionality based on the items listed (see page 2-5).

Upgrading your AK-SC255

Always backup original database prior to performing upgrade / downgrade.

To either upgrade or downgrade AK-SC255 software, it is recommended that this process is done in incremental (release software) steps. *Ensure that your AK-SC255 has been upgraded to 5.1 boot loader first*. Use AK255 Codeloader 4.0 program to load .cmot image. The New code-loader 4.0 and boot 5.1 support the new compressed, faster .csi file format

Compatibility with previous software:

Please consult the Technical Support Information Bulletin (0034) for specific details on compatability questions

New Features & Functions / resolved items

New Support for Siemens Lighting Panels

New Alarm routing system

Flexible alarm routing with the ability to output alarms to relays, modem, IP address, buzzer, front LED Automatically send test alarms based on time interval or schedule Different alarm actions can be set for each controller / application Critical & Severe levels

- Lennox Roof Top Controller Support
 Connect Lennox RTU via LonTP 78 communications bus.
- Siemens Lighting Panel Interface
 P1 Lighting panel support using built in AK-SC255 Modbus port

Enhancements & fixed items

CCB items reflect small enhancements & fixed items. Each item listed represents new items or corrections in the 02_081 software.

CCB Item	Status	Description	
25496000	Closed	User Can not Manual On or Off Gas Valve	
961216	Closed	New modem option - Hayes Accura V92	
961214	Closed	Dew point from SC255 needs to be sent to a Generic	
		device in Degrees C	
961172	Closed	When viewing File Management - Internet Files using	
		AKA65, files displayed 'SC255' are the edf files should	
		show Web files.	
961114	Closed	Improvements to Quick Menu operation with AK2-303	
		and 255 (Look in Analysis for how to info)	
961100	Closed	Use EKC 202D2 as a local display	
961097	Closed	R401A lookups incorrect; add R422D to Refrig List	
961089	Closed	Win255 Drops on Live Connection	
961088	Closed	Added Lighting Shutdown DI	
961083	Closed	Support for Carlo Gavazzi Energy Meter	
961080	Closed	Enhanced screen support with Distech thermostats	
961070	Closed	When configuring internal schedules in the Distech I can	
		not enter times greater than 1439.	
961057	Closed	Added shut down input per HVAC for AHU and RTU's	
961056	Closed	Expand the Neutral Zone max from 20 PSI to 40 PSI on	
		the single version code	
961053	Closed	After an alarm has been acknowledged would like the	
		ability to have the alarm to commence timing out again.	
961043	Closed	DCU's are simply missing the "It's ok to come out of	
		External Shutdown" mode message	
961038	Closed	Reset Oil Lockout button not accessable on Compressor	
		# 2	
961028	Closed	HVAC Status (02-0001) reads incorrectly.	
961026	Closed	Fixed status on the HVAC Menu screen (02-0001) that	
		reads incorrectly when only in Dehumidification	
		(desiccant)	
961012	Closed	Allow User to Select either Discharge or Dropleg Trans-	
		ducer for Sat Cond Control	
961000	Closed	Find new Nodes button removed	
960998	Closed	Corrected problem in AKA65 if not the same version as	
		AK-SC255 Win255 version confusing if not the same as	
		actual 255	
960993	Closed	Update time of 255 on connect of AKA65	
960956	Closed	Allow Alarm Delay after Defrost to be set to 0 minutes	
960874	Closed	Added phase loss for condensers	
960873	Closed	Would like to have CFM as an option for compressor size	
960872	Closed	Need zone sensor descriptions on HVAC status screen
