8 step guide

How to set up your new Danfoss PC

Click the flags below to see this guide in other languages

Congratulations on your new Danfoss PC!

Your new computer is now **ready for configuration**, and you will soon be up and running.

The computer that you received is configured to support you in performing **standard tasks in a sales or administration role** at Danfoss.

If this does not match your need, or if you have other questions regarding your configuration, **please contact Service Desk (1234)** before you start the installation. Please also contact **Service Desk (1234)** if you run into issues during the installation.

Before you begin, you need 45 minutes and a few other things:

A Danfoss account

Wi-Fi connection

A **Temporary Access Pass (TAP) key** approved by your manager and sent by email – or a physical **Security Key**

Multifactor Authentication registered to your Danfoss account and your mobile device

1/8

Plug in the power cable to a wall outlet
and turn your PC on

Remove all network cables

2/8

Choose your region and keyboard layout

3/8

Connect to Wi-Fi

On a Danfoss location, use the **DanfossMobile**, **DanfossWiFi**, or **DanfossGuest** network. If you do not have access to a WiFi network, please contact your manager or ServiceDesk (1234)

Your PC will now start **enrolling**, and a reboot is performed

4/8

Log on to your PC

Enter your **Danfoss account** credentials
(email and password) to sign in

5/8

Complete the **Multifactor Authentication** validation using a **TAP** key or a physical **Security Key**

6/8

Log on to your PC again

Enter your **Danfoss account** credentials
(email and password) to sign in

7/8

Set up **Windows Hello** – a new way to log in to your Microsoft account

To set up **Windows Hello**, you need to configure a pin code. Windows Hello can also be set up using a fingerprint scanner or a camera for face recognition.

8/8

Congratulations!

Your new Danfoss PC is **now ready for use**

Please note that it will take 15-20 minutes before your PC can access company resources like company email, Teams, etc.

Unleash the full potential of your new Danfoss PC

Default installed programs include Microsoft Office, Teams, and Microsoft Edge

You can find other programs and applications by opening the **Company Portal** and search for the software you need

If you **need support**, please contact Service Desk (1234)
