

# O-RINGS, INVERTER ASSEMBLY

100310-2

**Installation and servicing of Danfoss Turbocor® compressors by qualified and product trained personnel only. Follow these instructions and sound refrigeration/electrical/servicing practices relating to installation, commissioning, maintenance, and service.**

Consult the appropriate Danfoss LLC Service Manual on <a href="http://www.turbocoroem.com">www.turbocoroem.com</a> for detailed service instructions.	<b>Never power the compressor without the top covers in place and secured.</b>  <b>Removing the mains input cover will expose you to hazardous voltages. Ensure the mains input power is off and locked out before removing the cover.</b>  <b>Before removing the top cover, wait at least 20 minutes after isolating AC power to allow the high-voltage capacitors to discharge.</b>	Always wear appropriately rated safety equipment when working around equipment and/or components energized with high voltage.  <b>This equipment contains hazardous voltages that can cause serious injury or death.</b>	<b>Recover all refrigerant from compressor in accordance with local codes and ensure pressure is fully vented before the removal of refrigerant containing components.</b>
