

## OPERATION

Solenoid Valve, Spool Type, 2-Position, 4-Way, 08-size. When de-energized, the SV08-24-01 allows flow from port 3 to port 2, and from port 4 to port 1. When energized, the spool shifts to allow flow from port 3 to port 4, and from port 2 to port 1. Follow the "Operating Envelope" limits to ensure shifting of the valve during operation.

Shown with Standard Coil,  
Deutsch Connector

## APPLICATIONS

These spool-type valves are primarily used in mobile and industrial applications for controlling the direction of the flow in a circuit, like motors or cylinders. Can be used in combination to duplicate a four-way, three-position valve, creating an economical, compact function. Solenoid spool-type valves are direct acting and respond quickly to coil voltage input. Spool valves will have some leakage due to spool clearance, so if your application requires no leakage at the working port(s), apply a low leakage poppet valve(s), like PO check valve, counterbalance valve, etc., in addition to this solenoid valve. This valve can operate with an inlet pressure of 315 bar on port 3 for 500,000 cycles. Port 1 may be pressurized to 210 bar, but is not intended for use as inlet (Tank only).

## SPECIFICATIONS

<b>Rated pressure*</b>	230 bar [3300 psi]**
<b>Rated flow at 7 bar [100 psi]</b>	8 l/min [2 US gal/min]
<b>Weight</b>	0.32 kg [0.71 lb]
<b>Cavity</b>	SDC08-4
<b>Standard Coil</b>	M13 20 Watt
<b>Robust Coil</b>	R13 16 Watt Robust Nut P/N <b>173800539</b> (no coil O-rings needed)

\* Rated Pressure based on NFPA fatigue test standards (at 1 Million Cycles).

\*\* See 315 bar pressure rating note on page 10.
