

Danfoss is pleased to introduce the following upgrades to our market leading HIC design tool, **EasyManifold**:

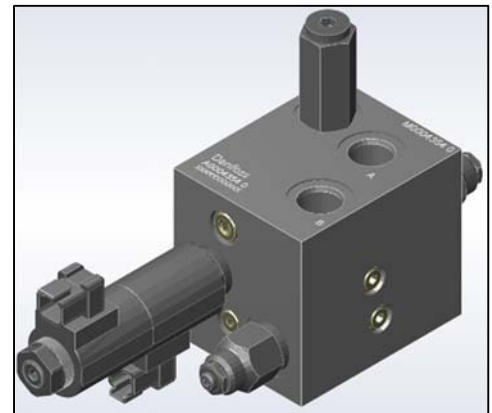

### Shopping Cart

- Quickly specify complete valve configurations to generate a model code, list price, and lead-time
- All Danfoss ICS catalog cartridge valves are loaded and available for configuration
- Intuitive user-interface that is great for both inside and outside sales
- Unlimited number of valves can be added to the 'Cart' which provides an output of all information in both PDF and Excel formats

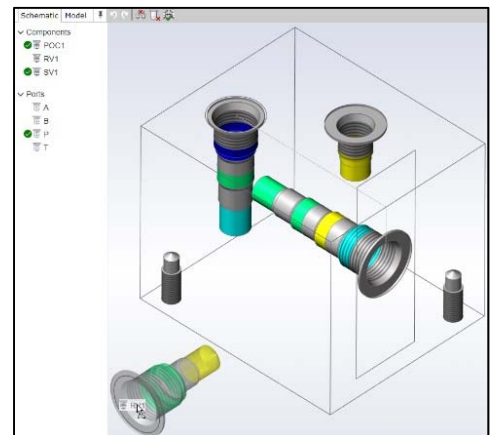

### Manifold Assembly Viewer

- View full 3D models of all automatically designed HICs inside EasyManifold. No downloading of files or additional software is needed
- Offers the ability to take a detailed look at all design features of each HIC through rotate, zoom, and measurement tools
- Available to all EasyManifold users!

### Enhanced Constraint Manager

- Specify desired locations for ports and valves in a 3D environment using an intuitive drag and drop interface
- Snap functionality allows for easy alignment between features
- As features are added, the block will automatically re-size to meet the layout requirements
- Automated check for potential design issues, including interference and invalid constraints
