

Fact Sheet

DrivePro® Retrofit

Strategic replacement for best productivity

DrivePro® Retrofit

Manage the end of product lifecycle with professional help to replace your legacy drives. The DrivePro® Retrofit service ensures optimal uptime and productivity during the replacement process, through:

- Audit of the current environment
- Planning
- Delivery of the required retrofit kit into your existing environment.

Save time, save cost

- Save time searching. We recommend the best drive for the job based on experience of many similar applications.
- Save cost. Minimize the impact on your existing process and installation, to avoid unplanned downtime. And make the most of the existing drive system.

This predictability gives you a strong business case and a stable, reliable budget.

Often there is a commercial advantage in scheduling replacement of a large volume drives in a single coordinated project.

Improve productivity

Retrofit to the most suitable drive for your application. A retrofit gives you the chance to improve overall performance by introducing new functions and the latest technology. We help you assess which drives deliver the best possible performance for your precise application.

Stay calm. You're covered

All DrivePro® services offer the comfort of knowing Danfoss Drives takes responsibility for supporting its VLT® and VACON® products well into the future:

- Industry's longest warranty coverage, up to six years
- Spare parts support for up to 10 years beyond discontinuation of a product line
- 24/7 delivery
- One call, one single point of contact
- Certified factory and local technicians
- Original equipment replacement parts

Local fit, worldwide

We ensure that the replacement drive is in full compliance with local regulations. And you enjoy worldwide support by Danfoss global service organizations.

Know your budget

Create a planned schedule for replacement of your existing end-of-lifecycle drives, well in advance.

Save

time and money with early planning

Feature	Benefit
The right drive for the application – adopt the latest technology	– Achieve additional process and energy efficiency in your existing system – Only pay for what you need – 100% compatibility and durability – Ensure best protection for your other equipment
Coordinated replacement of large volumes of drives	Mitigates installations cost
Replacement schedule	– Minimize the impact of product end-of-life on process availability – Ensure maximum uptime – Avoid unexpected cost for emergency drive support – Time the retrofit to get the most out of your existing drive system
One contact person	– One call, one single point of contact – Save time and ensure a fast response – Avoid complexity

Coverage
