**MANUFACTURER'S DECLARATION**  
**Danfoss Drives A/S**

declares under our sole responsibility that the

Product(s)

**VLT® Automation Drive FC 302 with built in  
Safety Option MCB 150, MCB 151 or MCB 152**

always enters the safe state if an internal or external error of the Safety Option is detected.

Any internal or external error of the Safety Option switches off the safe output S37 or prevents the output S37 to switch on.

As a result, the drive will always enter the safe state by triggering the safe torque off (STO) of the drive or will remain in the safe state (depending on the precondition of the safe output).

An indication of an internal or external error of the safety option does not indicate that the drive is in an unsafe state.

Date: 06.12.2015	Issued by Signature Stefan Mahne Product Manager, Functional Safety	Date: 7/12-2015	Approved by Signature Michael Termansen Vice President, Design Center DK and DE
