

VLT® OneGearDrive®

VLT® OneGearDrive® is a highly efficient permanent-magnet three-phase synchronous motor coupled to an optimized bevel gear box. As part of the Danfoss VLT® FlexConcept® the VLT® OneGearDrive® is an energy efficient drive system that helps to optimize plant productivity and reduce energy costs.

VLT® OneGearDrive® Hygienic

Up to 89%

system efficiency

Utilizing PM Motor technology which exceeds IE4 Motor Super Premium Efficiency Class.

With only one motor type and three available gear ratios, the motor concept covers all typical versions of conveyor drives commonly used in the food and beverage industry. Furthermore, the restricted range of physical configurations of the VLT® OneGear-Drive® reduces number of spares and makes it more cost efficient, easing engineering and installation thanks to uniform mechanical dimensions.

Flexible plant design

In combination with the VLT® AutomationDrive FC 302 or the VLT® Decentral Drive FCD 302 the VLT® OneGearDrive®

is equally suited to central and decentral installations, giving the plant designer complete flexibility from the outset. As a whole, the system can reach energy savings of up to 40% compared with conventional systems.

Two versions

The VLT® OneGearDrive® comes in two versions, the VLT® OneGearDrive® Standard for use in dry and wet production areas and the VLT® OneGearDrive® Hygienic for use in wet areas, areas with high cleaning intensity and aseptic and clean room production areas.

| Feature | Benefit |
|---|--|
| High system efficiency incl. frequency converter | Save money and energy – up to 40% energy savings compared to conventional systems |
| High-efficiency Permanent-magnet three-phase synchronous 10-pole motor with bevel gear drive | Better than Super Premium Efficiency class IE4 |
| Available hollow shaft diameters: 1-1/4", 1-7/16", 1-1/2" and 30, 35, 40 mm shaft sizes | - Flexible adaption to customer standards |
| Completely smooth enclosure leaves no crevices or dirt traps | Easy to cleanSafe production |
| Motor connection with Danfoss CleanConnect® stainless steel circular connector | Safe connection in wet areas Fast installation and replacement High cleanability |
| Motor and brake connections via terminal box with CageClamp® technology | Fast, reliable connectionLower installation cost |
| Aseptic coating | Resistant to detergents and disinfectants (pH 214) |
| Gearbox without breather vents and use of food grade lubricants compliant with FDA and NSF requirements | Up to 35,000 operating hours in partial load between oil change |
| High degrees of protection: – IP 67 and IP 69K (OGD- H) – IP 65 and IP 67 (OGD- S) | Unrestricted use in wash down areasHigh protection in wash down areas |
| Fan-free operation | Less noise emission No air-born germs and dirt particles to be drawn into the motor and then expelled back into the surrounding air |
| Only 3 gearbox ratios in one common design | Up to 70% reduction in variants reduces spare part stock |
| Compatible with all Danfoss frequency converters FC/D 302 from 1.5-3 kW | Your choice of central and decentral instalations |

In both versions, completly smooth, easy to clean surface without cooling fins, prevents pockets of dirt from forming and allows detergents to drain off freely. The fan-free motor avoids the risk of air-borne germs and dirt particles being drawn in and then expelled back into the surrounding air.

Hygienic design

The VLT® OneGearDrive® Hygienic complies with food contact applications FDA CFR 175.000. Best cleaning hygienic design – EHEDG (European Hygienic Engineering & Design Group). Clean rooms and aseptic filling by IPA (Fraunhofer institue) "Air Cleanliness Classification" DIN EN ISO 14644-1.

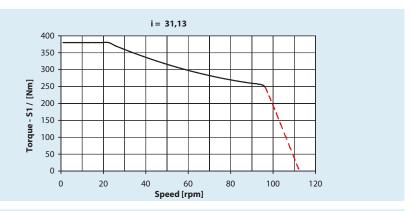

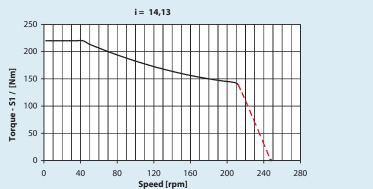

Specifications

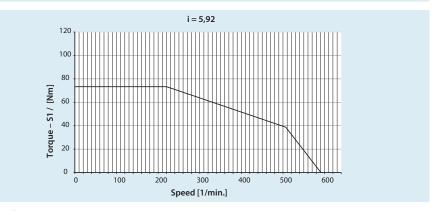

| Power rating | 1.5 – 3.0 kW |
|---------------|----------------|
| Speed max | 3000 rpm |
| Frequency max | 250 Hz |
| Current max | 7.2 A |
| Torque | 1.7 Nm/A |
| Voltage | 120 V/1000 rpm |
| Weight | Approx. 28 kg |

Speed/torque characteristics

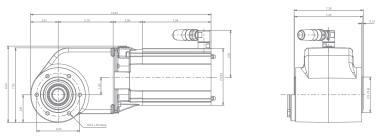

Gear ratios i = 31.13; i = 14.13 and i = 5.92 (max 3.0 kW)
